When I'm not coding or working on projects, I build small home assistance tools to improve daily life. I enjoy 3D printing parts and writing the software for them. Staying active is important to me, whether it's playing indoor football with friends or going out for a breather. This balance helps me learn new things and turn simple ideas into something useful.

About

Full-stack mobile and web developer specialising in Flutter, Dart, Supabase, FastAPI, and Cloud-integrated systems. Experienced in building end-to-end applications across healthcare, finance, telecommunications, logistics, and consumer platforms. I deliver fast, scalable, production-ready apps and backends with clean architecture and maintainable code. Strong collaborator, mentor, and problem-solver with proven experience leading projects end-to-end.

Core Skills

Mobile & Web Development

Flutter & Dart • Angular & TypeScript • Java • C# (.NET Core APIs)
Node.js & Express • Python (FastAPI) • C++ • REST APIs • PostgreSQL

Cloud & Infrastructure

Supabase • Firebase • Google Cloud • Microsoft Azure • AWS

DevOps & Methodologies

CI/CD • Git • Agile • Scrum • Testing & Debugging • Code Reviews

Other Technical Strengths

Real-time systems • Embedded integration (OBD2) • API design • System architecture

Freelance Services Offered

Mobile App Development (Flutter, Android/iOS)

Full-Stack Development (Supabase, FastAPI, .NET Core)

Custom API Development & Integrations

Cloud Architecture & Deployment

Database Design (SQL/PostgreSQL)

Web Application Development

Maintenance, Debugging & Optimisation

IoT & OBD2 App Integration

Agile Project Leadership

Portfolio Highlights

Ozow Flutter Wrapper

Built a fully functional wrapper for the Ozow Payment API, enabling fast, secure integration for Flutter developers and simplifying payment flows across mobile apps.

Yoco Flutter Wrapper

Developed a robust Flutter package for Yoco, streamlining mobile payment integration and improving reliability for developers building POS and payment-enabled apps.

Professional Experience

Monkey and River — Software Developer

Centurion | Aug 2024 – Present

- Built and maintained mobile & web apps for healthcare, finance, telecoms, logistics, and loyalty industries.
- Delivered member-facing apps, fleet management systems, MVNO platforms, and rewards programs.
- Led projects, coordinated development teams, and ensured on-time delivery.
- Mentored junior developers through code reviews and knowledge sharing.
- Integrated third-party APIs, optimised performance across Android, iOS, and web.
- Managed production issues, ensuring stability, scalability, and clean code.
- Attended client meetings, gathered requirements, and presented progress.

Canbushack — Mobile App Developer

Rosebank, JHB | Feb 2024 – Aug 2024

- Built an OBD2-enabled mobile app using Flutter for vehicle diagnostics.
- Developed firmware using C++ for seamless communication with OBD2 systems.
- Designed PostgreSQL database structure for real-time data storage.
- Implemented backend services in Python for request processing & communication.
- Improved user experience and app performance with continuous iterations.

EESUp — Full-Stack Developer

Midrand | Jun 2022 – Feb 2024

- Built a Flutter mobile application with seamless UX and stable performance.
- Designed Supabase backend with authentication, real-time updates, and secure storage.
- Integrated front-end and back-end for a fully cohesive app ecosystem.
- Implemented CI/CD pipelines for fast deployments.
- Conducted extensive testing and debugging for reliability.
- Delivered solutions collaboratively across cross-function teams.

Freelance — Full-Stack Mobile App Developer

Remote | Jul 2020 – Feb 2024

- Delivered multiple mobile applications using Flutter.
- Designed scalable, secure backends using Supabase, FastAPI, and Python.
- Managed full project lifecycles using agile practices.
- Provided maintenance, debugging, and feature updates.
- Built custom client solutions across industries with strong communication and reliability.

Education

BSc Computer Science & Informatics

University of Johannesburg | Feb 2020 – Nov 2023

Key Modules & Strengths:

- Java, C#, Python, JavaScript, Dart, C++
- SQL & Database Management
- Software Engineering & Agile
- Data Structures & Algorithms
- Web Development (HTML, CSS, JS)

Youngwoong So
UX/UI Product Designer

In my free time, I enjoy callisthenics and bouldering, keeping things interesting. When I'm not climbing, I watch YouTube tutorials for home repairs. Lately, I've been exploring 3D printing as a maker-in-training. I thrive on movement, curiosity, and the small chaos of life.

About

UX/UI Product Designer with experience across enterprise systems, safety platforms, automotive services, healthcare, and government digital products. Skilled in transforming complex requirements into clear, intuitive user experiences backed by research. Delivered 15+ multi-industry projects, collaborating closely with engineers, PMs, and stakeholders from concept to deployment. Strong background in branding, prototyping, and scalable design systems.

Core Skills

Product & UX Skills

User Experience Design • User Interface Design • Interaction Design
Product Strategy • Wireframing • User Flows • Journey Mapping
Usability Testing • Rapid Prototyping • Design Research

UI & Visual Design

Responsive Design • Branding • Design Systems
Illustration • Motion/Animation • Visual Storytelling

Tools & Technologies

Figma • Sketch • Framer
Adobe Creative Suite (Photoshop, Illustrator, After Effects)
Zeplin • Google Analytics • Bubble.io • WordPress

Additional Technical Skills

HTML • CSS • Basic front-end understanding
Video Editing • Animation & Micro-interactions

Freelance Services Offered

UX/UI Design for Web & Mobile

Product Design from Concept → Prototype → Delivery

Branding Systems & Identity Design
